Раздел 4. Методические материалы, определяющие процедуры оценивания знаний, умений, навыков и (или) опыта деятельности, характеризующих этапы формирования компетенций

1. Для текущего контроля используются следующие оценочные средства:

1. Контрольная работа по разделу/теме

Контрольная работа выполняется с целью проверки знаний и умений, полученных студентом в ходе лекционных и практических занятий и самостоятельного изучения дисциплины. Написание контрольной работы призвано установить степень усвоения студентами учебного материала раздела/темы и формирования соответствующих компетенций.

Подготовку к контрольной работе следует начинать с повторения соответствующего раздела учебника, учебных пособий по данному разделу/теме и конспектов лекций.

Контрольная работа выполняется студентом в срок, установленный преподавателем в письменном (печатном или рукописном) виде.

При оформлении контрольной работы следует придерживаться рекомендаций, представленных в документе «Регламент оформления письменных работ».

2. Опрос

Опрос представляет собой совокупность развернутых ответов студентов на вопросы, которые они заранее получают от преподавателя. Опрос может проводиться в устной и письменной форме.

Подготовка к опросу включает в себя:

- изучение конспектов лекций, раскрывающих материал, знание которого проверяется опросом;
- повторение учебного материала, полученного при подготовке к семинарским, практическим занятиям и во время их проведения;
- изучение дополнительной литературы, в которой конкретизируется содержание проверяемых знаний;
- составление в мысленной форме ответов на поставленные вопросы.

3. Схема/граф-схема

Схема — графическое представление определения, анализа или метода решения задачи, в котором используются символы для отображения данных.

Граф-схема — графическое изображение логических связей между основными субъектами текста (отношений между условно выделенными константами).

Для выполнения задания на составление схемы/граф-схемы необходимо:

1. Выделить основные понятия, изученные в данном разделе (по данной теме).
2. Определить, как понятия связаны между собой.
3. Показать, как связаны между собой отдельные блоки понятий.
4. Привести примеры взаимосвязей понятий в соответствии с созданной граф-схемой.

4. Тест

Тест это система стандартизированных вопросов (заданий), позволяющих автоматизировать процедуру измерения уровня знаний и умений обучающихся. Тесты могут быть аудиторными и внеаудиторными. Преподаватель доводит до сведения студентов информацию о проведении теста, его форме, а также о разделе (теме) дисциплины, выносимой на тестирование.

При самостоятельной подготовке к тестированию студенту необходимо:

- проработать информационный материал по дисциплине. Проконсультироваться с преподавателем по вопросу выбора учебной литературы;
- выяснить все условия тестирования заранее. Необходимо знать, сколько тестов вам будет предложено, сколько времени отводится на тестирование, какова система оценки результатов и т.д.
- работая с тестами, внимательно и до конца прочесть вопрос и предлагаемые варианты ответов; выбрать правильные (их может быть несколько); на отдельном листке ответов выписать цифру вопроса и буквы, соответствующие правильным ответам. В случае компьютерного тестирования указать ответ в соответствующем поле (полях);
- в процессе решения желательнее применять несколько подходов в решении задания. Это позволяет максимально гибко оперировать методами решения, находя каждый раз оптимальный вариант.
- решить в первую очередь задания, не вызывающие трудностей, к трудному вопросу вернуться в конце.
- оставить время для проверки ответов, чтобы избежать механических ошибок.

2. Описание процедуры промежуточной аттестации

Оценка за зачет/экзамен может быть выставлена по результатам текущего рейтинга. Текущий рейтинг – это результаты выполнения практических работ в ходе обучения, контрольных работ, выполнения заданий к лекциям (при наличии) и др. видов заданий.

Результаты текущего рейтинга доводятся до студентов до начала экзаменационной сессии.

Цель зачета – проверка и оценка уровня полученных студентом специальных знаний по учебной дисциплине и соответствующих им умений и навыков, а также умения логически мыслить, аргументировать избранную научную позицию, реагировать на дополнительные вопросы, ориентироваться в массиве информации.

Зачет может проводиться как в формате, аналогичном проведению экзамена, так и в других формах, основанных на выполнении индивидуального или группового задания, позволяющего осуществить контроль знаний и полученных навыков.

Подготовка к зачету начинается с первого занятия по дисциплине, на котором обучающиеся получают предварительный перечень вопросов к зачёту и список рекомендуемой литературы, их ставят в известность относительно критериев выставления зачёта и специфике текущей и итоговой аттестации. С самого начала желательно планомерно осваивать материал, руководствуясь перечнем вопросов к зачету и списком рекомендуемой литературы, а также путём самостоятельного конспектирования материалов занятий и результатов самостоятельного изучения учебных вопросов.

По результатам сдачи зачета выставляется оценка «зачтено» или «не зачтено».

Экзамен преследует цель оценить работу обучающегося за определенный курс: полученные теоретические знания, их прочность, развитие логического и творческого мышления, приобретение навыков самостоятельной работы, умения анализировать и синтезировать полученные знания и применять их для решения практических задач.

Экзамен проводится в устной или письменной форме по билетам, утвержденным заведующим кафедрой (или в форме компьютерного тестирования). Экзаменационный билет включает в себя два вопроса и задачи. Формулировка вопросов совпадает с формулировкой перечня вопросов, доведенного до сведения обучающихся не позднее чем за один месяц до экзаменационной сессии.

В процессе подготовки к экзамену организована предэкзаменационная консультация для всех учебных групп.

При любой форме проведения экзаменов по билетам экзаменатору предоставляется право задавать студентам дополнительные вопросы, задачи и примеры по программе данной дисциплины. Дополнительные вопросы также, как и основные вопросы билета, требуют развернутого ответа.
